

Win the AI learning deal.

Give your customers AI learning that helps their people solve problems, build skills and perform in the flow of work.

AI-NATIVE. END TO END.

Help people act.

A worker has a question. Their Living Course and AI Tutor help them find the next step, practise and keep learning.

One connected system

Sources, creation, delivery, guidance and learning evidence.

Learning in the flow of work

Mobile access, voice and help linked to the learner's task.

A course that stays useful

Reviewed updates arrive in the existing learning journey.

A stronger offer to take to market.

Show customers considering Workday + Sana how learning can support everyday work.

Bring your customer's task. See the learning respond.

Website product capture: mobile Tutor, illustrative course.

A problem. A question. A next step.

A frontline worker faces an unfamiliar customer return. Learning starts with the situation in front of them.

1 Open the task

See the expected outcome and connected guidance on a phone.

2 Ask or speak

Talk through the question with the AI Tutor.

3 Try the decision

Use an example or supported practice activity to check understanding.

4 Keep learning

Return to the Living Course as guidance and needs change.

AT THE MOMENT OF NEED

This return is outside the usual window.
What should I check?

AI TUTOR

For this exception, record the return reason and request manager approval before issuing a refund.

Source: Returns procedure

Illustrative course evidence

Let's check your next step.

What will you record before requesting approval?

Current course

Task guidance

Learner context

Give sellers a concrete reason to win.

A mobile learning experience for frontline and distributed teams, connected to the work customers need done.

Illustrative customer scenario, not a recorded outcome. Voice requires an enabled workspace; structured practice supports selected topics.

Make every update count.

Connect what the business knows, what the course teaches and what the learner does next.

Trace the answer. Check the source.

Learners can inspect cited course material. Task-linked guidance gives the Tutor evidence for the work at hand.

THE CONNECTED LEARNING MODEL

The learning continues in the existing course.

One change enters. The whole system responds.

A differentiated offer. Recurring revenue potential.

Pair your customer reach with Upskillable subscriptions. Prove the learning experience, then agree resale, distribution and renewal economics.

Put Upskillable in your next customer conversation.

Automatic source tracing is in development. This diagram is illustrative; updates require approval. Integration and resale terms are agreed per partnership.
